## Termination for Late Payment under JCT: Supreme Court Restores the High Threshold

[Providence Building Services Ltd v Hexagon Housing Association Ltd \[2026\]](#)  
[UKSC 1](#)

### Court

Supreme Court of the United Kingdom

Lord Reed PSC, Lord Briggs, Lord Burrows, Lord Stephens, Lord Richards

### Subject Matter

Construction contract – JCT Design and Build 2016 (and 2024) – termination for late payment – repeated default – construction of clause 8.9 – standard form contracts – contractual interpretation.

### Key Issue

Whether, under **clause 8.9 JCT D&B**, a Contractor is entitled to terminate **simply because the Employer has paid late twice**, even if the **first late payment was cured within 28 days** and therefore never gave rise to a right to terminate.

### Material Facts

1. The contract incorporated **JCT Design and Build 2016**.
2. In December 2022, the Employer paid an interim payment **14 days late**.
3. The Contractor served a **specified default notice** under clause 8.9.1.
4. The Employer **paid within 28 days** of the notice.
5. In May 2023, the Employer paid another sum late.
6. The Contractor **terminated the following day**, relying on clause 8.9.4 (“repeat default”).

### Procedural History

- **TCC (Adrian Williamson KC):** Employer succeeds – termination invalid
- **Court of Appeal:** Contractor succeeds – termination valid
- **Supreme Court:** Employer succeeds (unanimous)

## Contractual Framework

### Clause 8.9 JCT D&B (material parts):

- **8.9.1:** Right to serve notice for late payment
- **8.9.3:** Right to terminate if default **continues for 28 days**
- **8.9.4:** Right to terminate if Contractor did not terminate under 8.9.3 but the Employer **repeats a specified default**

## Decision

The Contractor was **not entitled to terminate**.

Clause 8.9.4 **only applies where the Contractor previously had an accrued right to terminate under clause 8.9.3** but did not exercise it.

If the first late payment is cured within 28 days:

- No termination right arises under clause 8.9.3
- Clause 8.9.4 is **never engaged**
- A later late payment does **not** justify termination

## Reasoning

### (1) Natural Meaning and Structure of the Clause

The opening words of clause 8.9.4:

“If the Contractor for any reason does not give the further notice referred to in clause 8.9.3...”

presuppose that:

The Contractor **could have terminated under clause 8.9.3.**

If repetition alone were sufficient, the reference back to clause 8.9.3 would be **redundant**: [32]-[33].

### (2) Commercial Common Sense

It would be:

“A sledgehammer to crack a nut”

if termination could follow from two trivial delays (e.g. two payments each one day late): [35].

The clause makes commercial sense only if the first default was **serious enough to crystallise into a termination right**.

### (3) No Presumption of Symmetry

The Court of Appeal relied on symmetry with the Employer's termination rights elsewhere in the contract.

The Supreme Court rejected this:

- Employer and Contractor obligations are **fundamentally different**
- The clauses are **differently worded**
- There is **no principle** that their termination rights must be symmetrical: [37]

### (4) No Policy-Driven Distortion

The Court accepted the importance of cashflow in construction, but held:

**It would be wrong to distort the language of the contract to achieve that policy aim:** [38]

### Interpretation of Standard Form Contracts

The Court reaffirmed that:

- The **ordinary modern principles of contractual interpretation** apply to standard forms: [29]-[31]
- But where parties adopt an industry standard form, it is legitimate to assume they intended:

**Consistency of meaning across the industry and consistency with the intentions of the form's drafters**

Cf **Tesco Stores Ltd v USDAW [2024] UKSC 28.**

### Practical Effect

Under **JCT D&B 2016 and 2024**:

- Two late payments are **not enough** to justify termination
- The first late payment must remain unpaid for **over 28 days** so that a termination right **actually arises**
- Only then can a **repeated default** trigger clause 8.9.4
- If the first default is cured in time, the repetition mechanism is not engaged

### Significance

- Overturns a contractor-friendly Court of Appeal decision
- Clarifies the operation of a **widely used JCT termination clause**
- Raises the practical threshold for termination for late payment
- Reinforces a **disciplined, orthodox approach** to standard form interpretation

### Key Takeaway

Termination for late payment under JCT remains a **high-threshold, high-risk remedy** and requires strict, clause-by-clause analysis before being invoked.

## Conclusion

*This decision restores the JCT termination machinery to what it was always meant to be: a **safety catch, not a hair trigger**.*

*The Court of Appeal's interpretation would have turned clause 8.9 into a contractual tripwire: two slightly late payments and down comes the guillotine, regardless of whether any real damage had been done. The Supreme Court has now put that particular piece of over-enthusiasm back in its box.*

*Termination, the Court reminds us, is not a performance art. It is not there to express irritation, teach lessons, or indulge in moral instruction. It is there for serious contractual failure, properly defined, properly triggered, and properly proved.*

*Under JCT, that still means what it always meant: **you only get the big red button if the first problem was big enough to justify it**. A minor, promptly corrected default does not become a capital offence merely because someone later commits another.*

*For practitioners, the message is reassuringly dull and therefore extremely important: read the clause, follow the steps, count the days, and resist the temptation to treat termination as a character assessment.*

*The Supreme Court has, in short, saved the industry from a world in which two late bank transfers could be treated as a hanging offence. Which is probably for the best.*
